Yapıda uyum ve kolaylık felsefesi bütünsel çözümlerle banyolara taşınıyor. Kale...

Our emphasis on harmonious and convenient interior design results in integrated bathroom solutions. Kale...

Kale markasıyla, kaliteli, fonksiyonel, estetik ve ulaşılabilir ürünleriyle her ev ve yerleşim için bütünsel banyo ürünleri sunan bir kuruluş olan Kalevit Saniter Seramik A.Ş.; Seramik sağlık gereçleri, tamamlayıcı ürünler, banyo ve mutfak armatürleri ve aksesuarları, duş sistemleri, akrilik küvet ve duş tekneleri, duş ve küvet kabinleri üretimi ve ticareti yapmaktadır. Kale banyo, kalite ve tasarıma önem veren, değişime ayak uyduran, verimliliği esas alan, müşteri odaklı çalışmayı prensip edinmiş bir marka olarak; yüksek kaliteli ürünleri, estetik, fonksiyonel ve ulaşılabilir tasarımları, üretiminde ve ürünlerinde çevreyi korumak felsefesi ve satış sonrası hizmet desteğiyle banyo sektöründe fark yaratmaktadır. Daima kaliteli ürün konseptini, kaliteli hizmet kavramıyla birleştiren Kale, satış ve satış sonrası servis sürecinde bu anlayışını devam ettirmektedir.

Tasarımcının ve iyi tasarımın her zaman yanında olan Kale banyo, sürekli gelişim felsefesiyle, ilklere imza atmaya devam etmektedir. Yarattığı birbirinden farklı serilerle her türlü ihtiyacı karşılarken, başarı çıtasını her geçen gün daha yukarıya taşımaktadır.

Kalevit Saniter Seramik A.Ş. manufactures a range of high quality, functional, aesthetic and accessible products bathroom products under the Kale brand that integrate well with any house or location. We manufacture and market ceramic sanitary ware, complementary products, bathroom and kitchen fixtures and accessories, shower systems, acrylic bathtubs and shower bases and shower and bath stalls. Kale is a brand that emphasizes high quality and superb designs for bathroom applications. We adapt to change, emphasize efficiency, and are committed to customer satisfaction. Kale has achieved a distinctive status in the bathroom sector with high quality products and designs that are aesthetically pleasing, functional and convenient. Kale has always combined the quality product concept with a quality service approach and continues to implement this philosophy in sales and after-sales service.

Kale Bathroom has always stood beside the designer and excellent design as it continues to realize a number of firsts in the field with its philosophy of continual improvement. It successfully meets every need with the distinctive series it has created while constantly raising the bar for achievement.

Kale'nin ilham veren hayallerine hayat verenler
Those who bring Kale’s inspiring dreams to life

Harri Koskinen

Eğitimini Lahti Tasarım Enstitüsü'nden sonra Helsinki Sanat ve Tasarım Üniversitesi'nde tamamlayan tasarımcı, çalışmalarını 1998 yılında kurduğu Friends of Industry isimli stüdyosunda sürdürüyor.

Koskinen'in kazandığı başarılar arasında Design Plus (2005, 2002, 1999), Compasso d'Oro (2004), Interior Innovation (2004), Fennia Prize (2003), IF Design (2002), Red Dot, Essen (2001) gibi ödüller bulunmaktadır.

The designer began his schooling at the Lahti Design Institute and completed his studies at Helwashbasini Art and Design University. He conducts his work at the studio he founded in 1998 called Friends of Industry.

Among Koskinen's achievements are awards such as Design Plus (2005, 2002, 1999), Compasso d'Oro (2004), Interior Innovation (2004), Fennia Prize (2003), IF Design (2002), Red Dot, Essen (2001).

Adolf Babel

"Free standing" küvet tasarımı ile kazanılan Red Dot Ödülü dışında çeşitli prestijli tasarım yarışmalarında da ödüle layık görülmüştür. Design Plus, If, Busse Longlife Design Award, Design Center, Batimat bunlardan birkaçıdır.

Adolf Babel bugün 6-8 kişilik çok uluslu ekibi ile modelleme ve tasarım çalışmalarını sürdürmektedir. Tasarımları, insanı odak noktası kabul eden sade çizgileri içermektedir.

In addition to the Red Dot Award from his "free standing" bathtub design, he has garnered awards in various prestigious design competitions, including Design Plus, If, Busse Longlife Design Award, Design Center and Batimat.

Currently, Adolf Babel continues his modeling and design work with a multi-national team of 6-8 people. His designs feature simple lines and focus on the human element.

Isao Hosoe

Isao Hosoe, 1942’de Tokyo’da doğdu. 1965’de Havacılık ve Uzay Sanayii lisans programından mezun olduktan sonra 1967’de fen alanında Tokyo Nihon Üniversitesi’nde mastır programını tamamladı. 1967’den beri Milano’da yaşayan Hosoe, 1967 – 1974 arası Ponti-Fornaroli-Rosselli stüdyosuyla birlikte çalışmasının ardından 1985’de kendi ismini taşıyan “Isao Hosoe Design”ı kurdu.

Born in 1942 in Tokyo, Isao Hosoe graduated from the Aviation and Space Industry undergraduate program in 1965 and then completed a Master’s program at Tokyo Nihon University in 1967 in the field of science. Hosoe has lived in Milan since 1967. From 1967 to 1974 he worked with the Ponti-Fornaroli-Rosselli studio. In 1985, he founded Isao Hosoe Design.

Piet Billekens

Piet Billekens, Academy for Industrial Design If Eindhoven’dan mezun olduktan sonra Milan’da Mimar Claudio Salocchi ile çalıştı. 2001 yılında, Foresee Design’ı kurdu. Nobili Rubinetterie, Superinox Nobili, Gedy, CGS ve Apogeo gibi şirketler için tasarım ürünleri geliştirdi.

Piet Billekens, banyo ürünlerinin yanında Nobili, Colombo Design, Fluid Café ve Aqutech için kabin içi tasarımlar yaptı. ADI-Design Indeks 2004’e Plus koleksiyonu ile seçilen Billekens, aynı yıl yine Plus koleksiyonu ile Mostra Convegno’da Comfort and Design ödülünü kazandı.

After graduating from the Academy for Industrial Design In Eindhoven, Piet Billekens worked with architect Claudio Salocchi in Milan. He founded Foresee Design in 2001. He has developed design products for companies, such as Nobili Rubinetterie, Superinox Nobili, Gedy, CGS and Apogeo.

In addition to bathroom products, Piet Billekens has executed interior cabin designs for Nobili, Colombo Design, Fluid Café and Aqutech. Billekens was selected for inclusion in the ADI-Design Index 2004 for his Plus collection, and in the same year, the Plus collection won the Comfort and Design award at Mostra Convegno.

Can Yalman

Tasarımın tüm insanlığın özünde tamamlayıcı bir felsefe olmasını amaçlar ve geleceğimize katkıda bulunabilecek bir güç olduğunu düşünür. Nurus, Hisar, Arçelik /Beko, Bosch, Teba, Tariş, Inform, BAT, Numarine gibi firmalar için tasarım projeleri gerçekleştirmiştir.

Aldığı ödüller arasında LG Elektronik Tasarım Yarışması (1999), Design Explorations Ödülü (2001) ve Steelcase Mondo Materials Ödülü (2001) bulunmaktadır.

He aims for design to be a complementary philosophy at the heart of humanity and believes that it is a force that can contribute to our future. He has executed design projects for companies, such as e HNurus, Hisar, Arçelik / Beko, Bosch, Teba, Tariş, Inform, BAT, and Numarine.

The awards he has won include LG Elektronik Design Competition (1999), the Design Explorations Award (2001) and the Steelcase Mondo Materials Award (2001).

Başak Ergin

1999 yılında Marmara Üniversitesi Endüstri Ürünleri Tasarımı bölümünü birincilikle bitirdi. Çeşitli firmalar için banyo / mutfak armatürleri, aksesuarlar, ayna ve aydınlatma konularında 8 yıl çalıştı.

2007 yılında Başak Ergin Design'ı kurdu. Seri üretimi yapılmış pek çok ürüne sahip olan Ergin'in, adına kayıtlı 20'den fazla tescili bulunmaktadır. 2007 yılından bu yana Başak Ergin Design olarak farklı sektörlerden firmalarla çalışmalarını sürdürmektedir.

She graduated from the Marmara University Industrial Design Department as the valedictorian of the class of 1999. She worked for 8 years on bathroom and kitchen mixers, accessories, mirrors and lighting for a variety of companies.

In 2007, she established Başak Ergin Design. Ergin has numerous products that have been mass-produced, including more than 20 registered in her own name. Since 2007, she has continued to work with companies in different sectors as Başak Ergin Design.

Tamer Nakışçı

Tamer Nakışçı uluslararası platformdaki tasarım kariyerine 2004 yılında Milano'da FIAT'ın konsept tasarım laboratuvarında adım attı. 2005 yılında Nokia için tasarladığı devrim niteliğindeki şekil değiştirebilen telefon "888" ile ilk uluslararası ödülü olan Nokia Benelux Design Awards'ı kazandı.

Avrupa Birliği tarafından belirlenen "Avrupa'nın yaratıcı geleceğini şekillendirecek 100 genç yetenek" arasına girerek, 2009 Avrupa Yenilikçilik ve Yaratıcılık yılı kapsamında Brüksel'de düzenlenen Yaratıcılık Forumu'nda İstanbul'u temsil etti.

Tamer Nakışçı began in design career on an international platform in FIAT's concept design laboratory in Milan in 2004. In 2005, he won the Nokia Benelux Design Award, his first international award, with "888", the revolutionary shape-changing telephone he designed for Nokia in 2005.

He represented Istanbul at the Creativity Forum held in Brussels as part of the European Year of Creativity and Innovation 2009 as one of the "100 young talents that will shape the creative future of Europe" identified by the European Union.

Angeletti Ruzza

Silvana Angeletti 1969 yılında Rieti'de doğdu. Daniele Ruzza 1967 yılında Roma'da doğdu. Roma'da bulunan I.S.I.A.'da Endüstriyel Tasarım bölümünden mezun olduktan sonra kendi stüdyoları olan Angeletti Ruzza Design'ı açtılar.

Teuco, Flaminia, Azzurra, F.lli Fantini, Guzzini, Colombo Design, Gsi, Irsap, Ad Hoc, Kohler, Serafino Zani, Foscarini, Valli & Valli gibi İtalyan şirketleri ile çalışıyorlar.

1999 yılından bu yana ADI'ye (Endüstriyel Tasarım Derneği) bağlıdırlar.

Silvana Angeletti was born in Rieti in 1969, while Daniele Ruzza was born in Rome in 1967. After receiving their degrees in Industrial Design from I.S.I.A. in Rome, they opened their own design studio: Angeletti Ruzza Design.

They work with Italian companies such as: Teuco, Flaminia, Azzurra, F.lli Fantini, Guzzini, Colombo Design, Gsi, Irsap, Ad Hoc, Kohler, Serafino Zani, Foscarini, Valli & Valli.

They have been members of ADI (Industrial Design Association) since 1999.

Habitat.

Üretimde, tasarımda ve teknolojide çevre dostu hareket.

—

Environmentally-friendly in production, design and technology.

Habitat. Üretimde, tasarımda ve teknolojide çevre dostu hareket. Environmentally-friendly in production, design and technology.

Kale banyo olarak, faaliyetlerimizin her aşamasında çevre ve enerji verimliliğine maksimum katkıda bulunmayı bir varlık nedeni olarak görüyoruz. Bu doğrultuda tüketicilerimize tasarruf, estetik ve konforu bir arada sağlayan ürünler sunmayı temel görevimiz olarak görüyoruz. Çünkü yaptığımız iş aslında suyun değerini bilmeyi ve bu değeri hayatınıza yansıtmayı gerektiriyor. Yani estetikle büyüleyen, hijyenle huzur veren ve yaşamınıza kattığı enerjiyle canlandıran banyolar yaratmayı...

Üretimde Habitat

Üretim sürecimizde, gelecek nesillere yaşanabilir ve temiz bir dünya bırakma hedefiyle hareket ediyoruz ve yenilenemeyen doğal kaynak tüketimini en aza indirmek için çalışıyoruz. Bir yandan üretim faaliyetlerinde çevre dostu yaklaşımı benimserken, diğer yandan kaynakları ölçülü ve etkin kullanıyoruz. Ayrıca, tüm tesislerimizde hammadde ve enerji kullanımını en aza indirmek için çalışmalarımıza devam ediyoruz.

Hammadde Tasarrufu
Tesislerimizde motor yağı, hidrolik yağı, elektronik ve metal atıklar gibi pek çok geri dönüştürülebilir atık, geri kazanım firmalarına gönderiliyor. Kalıphane bölümünde kalıp üretimi için hazırlanan modeller atılmayıp, yeni kalıpların modellerinde kullanılıyor. İşletmelerimizde farklı noktalarda bulunan toz toplama üniteleriyle, toplanan tüm hammaddeler tekrar üretim prosesine katılarak, sıfır atıkla üretime devam ediliyor. Sorumluluklarımız çerçevesinde her yıl bertaraf miktarlarımız Çevre Bakanlığı'na bildiriliyor ve tutanak altına alınıyor. Geri kazanılamayan ürün atıkları ise Çevre Bakanlığı tarafından onaylanmış bertaraf tesislerinde yakıta dönüştürülüp çimento ve tuğla fabrikalarında minimum atığa dönüştürülüyor.

Su Tasarrufu
İşletmelerimizin kuruluşu ile devreye giren ve sosyal sorumluluğumuz olan arıtma tesislerimiz ile atık suyumuz arıtılarak tekrar doğaya kazandırılıyor. Üretim prosesimizdeki suyun kullanımında yapılan iyileştirmeler ile tüketimlerimizin %22 azaltılması sağlanıyor. Çalışmalarımıza en yeni teknolojilere yatırım yaparak devam ediyoruz.

Enerji Tasarrufu
Kalevit Saniter Seramik işletmelerinde enerji kullanımını sürekli aşağıya çeken ender firmaların başında geliyor. Kilogram başına üretimde enerji maliyetlerinden elektriği %10, doğalgazı da %8 düşürerek 2010 yılı içinde büyük başarılara imza attık. 2011 yılı planlarımızda enerji sarfiyatında %6'lık bir tasarruf sağlamak için gerekli yatırım çalışmalarımız hazır bulunuyor.

Ambalaj Tasarrufu
2008'den beri Çevko ile anlaşmamız bulunuyor. Bunun yanında işletmemizde bulunan 2 adet ambalaj atığı sıkıştırma ve paketleme ünitesi ile işletmelerimizden her bir kağıt ve karton atığını toplayarak akredite firmalara gönderiyoruz. Her yerde bulunan ambalaj atık kutuları ile çalışanlarımızı da bilinçlendirerek gerekli katkımızı sağlıyoruz.

Tasarımda Habitat

Amacımız gelecek için çalışmak, daha az kaynak kullanarak üretmek ve tasarruf yapan ürünlerle tüketicilerimizi de bu yönde teşvik etmek. Tüm bunları başarmak için en ince ayrıntısına kadar üzerinde çalıştığımız iki şey var: Tasarım ve teknoloji. Kale banyo ürünlerinde göz alıcı tasarımların ve alışılmadık formların tek amacı sadece estetik kaygılar değil! Vitrifiye ürünlerimizin çoğunda görebileceğiniz incecik hatlar, daha az kaynak ve hammadde kullanılmasını sağlayan akılcı buluşlar aslında. Slim design felsefemiz, banyolarda çarpıcı görünümler yaratırken aynı zamanda sığ uzanma alanlı küvetleri ve daha az hammadde kullanarak üretilen ürünleri ile kullanıcıyı suyu daha özenli kullanmaya davet ediyor.

Here at Kale Bathroom, we believe that making the greatest possible contribution to the environment and energy efficiency at every stage of our operations is the primary reason for our existence. Our fundamental mission is to provide consumers with products that combine beauty, comfort and conservation because our job requires that we understand the value of water and reflect this value in our lives. In other words, to create bathrooms that charm with their beauty, give peace of mind with their hygiene and rejuvenate with the energy they add to our lives.

Habitat in Production

In our manufacturing process, our goal is to leave future generations with a cleaner world more conducive to life, and we are striving to minimize the consumption of non-renewable resources. In our production operations, we have adopted an approach that is friendly to the environment while at the same time using resources efficiently and wisely. Furthermore, in all of our facilities, we continue our efforts to reduce the use of raw materials and energy as much as possible.

Conservation of Raw Materials
Numerous types of recyclable waste generated in our facilities, such as motor oil and hydraulic oil, as well as electronic and metal waste, are delivered to recycling companies. The models built for mold production in our molding shop are not thrown away but are reused in new mold models. All of the raw materials gathered with our dust collection units found at various locations in our factories are put back into the manufacturing process so that production achieves zero waste. Within the framework of our responsibilities, we inform the Ministry of Environment every year regarding how much waste we dispose of and this is recorded. Product waste that cannot be recycled is burned as fuel in disposal facilities approved by the Ministry of Environment or converted to minimum waste in cement and brick factories.

Water Conservation
The purification facilities that went into operation when our business was formed and which are a part of our social responsibility recycle waste water and return it to nature. The improvements which have been made in the use of water in our manufacturing process has reduced our consumption of water by 22%. Furthermore, we continue to invest in the latest technology.

Energy Conservation
Kalevit Sanitary Ware Ceramic is a leader among the handful of companies reducing energy consumption in their facilities. We have made great strides in 2010 by reducing electrical energy costs per kilogram of production by 10% and natural gas costs by 8%. Investments to achieve savings of 6% in the use of energy have been identified in our 2011 plans.

Packaging Conservation
We have had an agreement with Çevko since 2008. In addition, we have two units that compress and package waste packing materials in our enterprise so that we can send all waste paper and cardboard generated by our facilities to accredited institutions. We have packaging waste bins everywhere and make the contribution required in this regard by keeping our employees informed.

Habitat in Design

Our goal is to work for the future, to produce using fewer resources and to encourage consumers to do the same with products that conserve these resources. There are two things we examine in minute detail in order to accomplish our goals: design and technology. Beauty is not the only concern in the eye-catching designs and unusual forms in Kale bathroom products! The fine lines you will see on most of our sanitary ware are actually clever discoveries that ensure more productive use of resources and raw materials. Our slim design philosophy creates stunning effects in the bathroom and also invites users to be more conscientious in their use of water with products that use less raw materials and bathtubs with shallower bathing areas.

Teknolojide Habitat
Habitat in Technology

Çevreye duyarlılığımızı, geliştirdiğimiz teknolojilerle de destekliyor, yaşam konforunuzu arttırırken, dünyamızı da düşünüyoruz.

Tasarım ve Arge ekibimiz, estetik ve fonksiyonellikten ödün vermeyen sıra dışı tasarımları, her bir üründe akılcı detaylarla ve yeni teknolojilerle buluşturuyor. Bunun sonucunda 2.7 litre ile tam fonksiyon yapabilen ve %55 su tasarrufu sağlayan klozetler, kullanımda hijyen ve kolaylık sağlayan ürünler gibi yaşam konforunuzu arttırırken çevreyi de koruyan ürünler üretiyoruz.

We support our sensitivity to the environment with the technologies we have developed and we think about our world even as we increase your comfort levels.

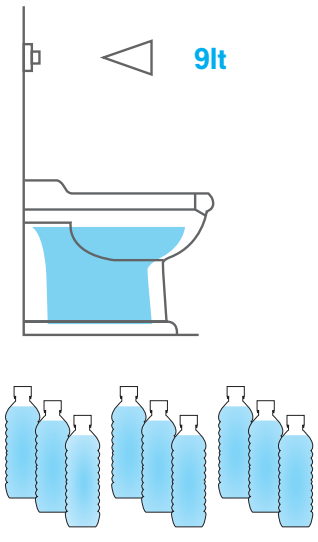
Our design and R&D teams combine original designs that do not compromise aesthetics or functionality with intelligent details and new technologies. Their efforts have resulted in products such as toilets that can perform a full flush with 2.7 liters or a flush that consumes 55% less water. By manufacturing products like this that are hygienic and convenient, we make your life more comfortable while protecting the environment.

En az suyla hijyen rekoru kıran klozetler
Toilets that break the record for hygiene with the least amount of water

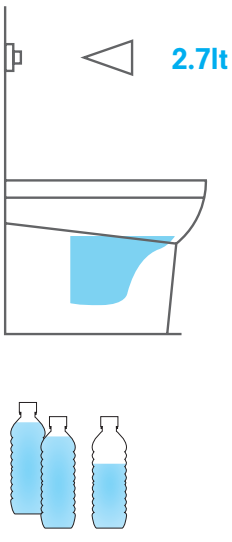
Lavabo ve duşta suyu kontrol edebiliyorsunuz. Peki ya klozet takımlarında? Kale klozet sistemleri su tüketimini sizin yerinize kontrol edebiliyor. Hijyen standartlarından hiç ödün vermeden geliştirdiğimiz klozet sistemi, sadece 2.7lt su ile yıkama yaparak %55 oranında su tasarrufu yapabiliyor.

You can control your water consumption at the sink and in the shower. But, what about in the toilet? The Kale toilet systems control water consumption for you. The toilet system that we have developed without compromising hygiene standards conserve 55% more water with only a 2.7 liter flush.

Standart Klozet / Standard WC



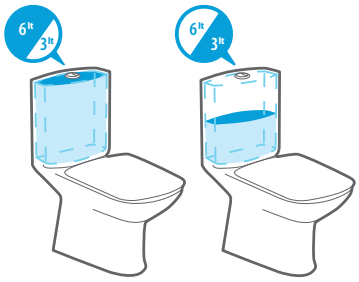
Kale Klozet / Kale WC



3/6lt ve start/stop iç takımlar ile ne kadar su gerektiğine siz karar verin.
3/6lt and start/stop you decide how much water you need with these internal assemblies.

İster 3lt düğmesine basın ister 6lt. Ya da su akışını hemen başlatın, istediğiniz zaman durdurun. Yani klozette kullandığınız suyu %40'a varan oranlarda düşürün. Bu ne demek? Kale'nin özel rezervuar sistemleri ile sadece klozette kişi başı yıllık ortalama 4.320lt su tasarrufu yapabilirsiniz demek.

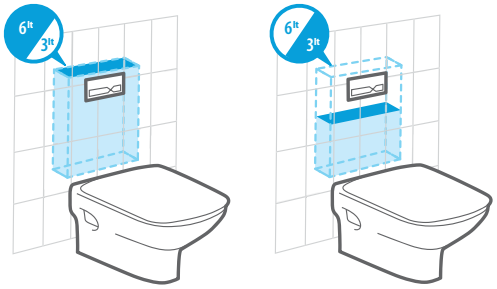
You can push either the 3-liter or 6-liter button, or you can start the water flowing immediately and stop it whenever you want. In other words, decrease the amount of water you use in the toilet by 40%. What does this mean? It means you can save an average of 4,320 liters of water per person yearly just in the toilet with Kale's custom tank systems.



Görünmez su tasarrufu: Gömme rezervuarlar
Invisible water savings: In-wall tanks

Gömme rezervuarlar, modern banyoların en estetik bileşenleri arasında. Ancak siz onları hiç görmeseniz de ince tasarımlı rezervuar panellerimiz, 3/6lt su boşaltım opsiyonlarıyla daima iş başında.

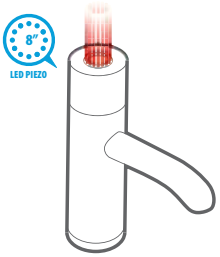
In-wall tanks are among the most aesthetic elements in modern bathrooms. However, our intricately designed tank panels are constantly at work with 3/6 liter flush options even though you cannot see them.



Zaman ayarlı armatür ile teknoloji suyun hizmetinde!
Fixtures with timers put technology at water's service!

Zaman ayarı teknolojisine sahip Kale Teknoloji Serisi armatürler, su kaynağının elektronik olarak kullanımına olanak veriyor. 8 saniyelik su akışı sağlayan armatürlerin su akışı, isteğe bağlı olarak yeniden ayarlanabiliyor.

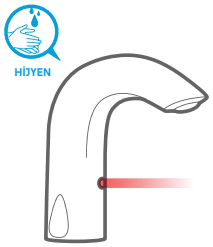
Kale fixtures with timer technology make it possible to electronically control water resources. The 8-second water flow from the fixtures may be reset as desired.



Sizin kadar hassas, çevre için sizin kadar duyarlı...
As sensitive as you are about the environment…

Kale Banyo, fotosel teknolojisi ile donatılmış ürünleri sayesinde banyolarda sizinle hareket eden, hem ekonomi hem çevre için tasarruf sağlayan bir anlayış sunuyor. Hassas sensörleri ile el teması olmaksızın çalışıyor.

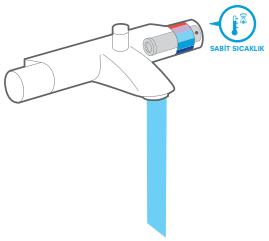
The Kale Bathroom offers an approach that features products equipped with photocell technology which moves with you and provides savings for both the economy and the environment. It operates without contact thanks to the precise sensors.



Merkezi sistemler için mükemmel tasarruf: Termostatik armatürler
Incredible savings for central systems: Thermostatic fixtures

Termostatik armatürler, bünyesindeki termostatik kartuş ile su miktarını ve sıcaklığını istenilen dereceye sabitleyerek hem haşlanmayı hem de fazla su tüketimini önlüyor.

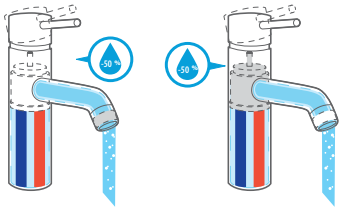
Thermostatic fixtures prevent scalding and excess water consumption by keeping the temperature and flow rate of the water constant with a thermostatic cartridge.



Debi kısıcılı perlatör ile sadece daha az değil, daha etkili su tüketimi
Low flow aerators not only ensure effective water consumption but less of it

Tüm kumandalı armatürlerimizde bulunan debi kısıcılı perlatör, suya köpüklü bir görünüm kazandırıyor. Siz suyu açtığınızda bu sayede tüketilen su miktarı azalırken su debisi sabit kalıyor.

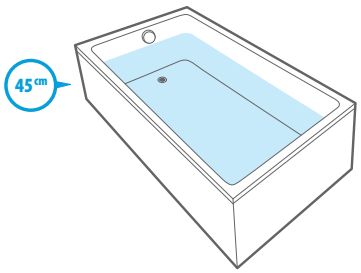
The low flow aerators on all of the single lever fixtures make the water appear foamy. As a result, when you turn on the water, the amount consumed is reduced but the flow rate remains the same.



Konforun tasarrufla buluşması: Kale küvetler
Comfort meets conservation: Kale bathtubs

Banyoları geometrinin çekici çizgileri ile tanıştıran Basics serisi, aynı zamanda su tasarrufuna da katkıda bulunuyor. Tasarımın işlevsellikle harmanlandığı Basics, alçak formu ve sıradan küvetlere göre sığ uzanma alanı ile otel gibi toplu kullanım alanlarındaki su tüketimini azaltmaya yardımcı oluyor.

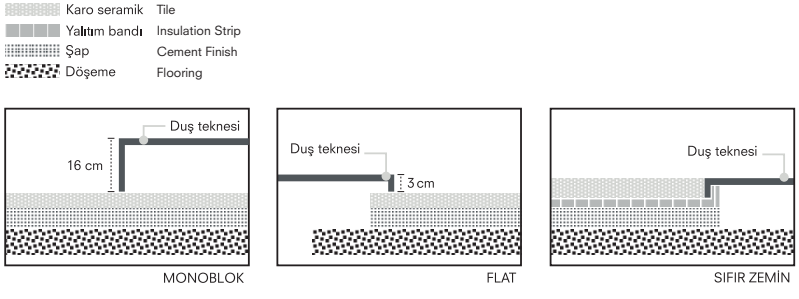
The Basics series introduces bathrooms to the allure of geometrical lines and also helps conserve water. Basics combines design with functionality while helping to reduce water consumption in public use areas such as hotels with lower sides and an area for lying down that is shallower than normal bathtubs.



Banyo konforunda yeni nesil çevrecilik: Enjoy
Next generation environmentalism in bathroom comfort: Enjoy

Kullanıcıyı suyla en az malzeme ile buluşturan tasarımlar... Günümüzün dinamik banyolarında kullanım kolaylığı ve estetiği bir arada bulmak isteyenler için mükemmel bir seçim olan Enjoy walk-in duş teknesi, zemine sıfır olarak tasarlandı. Bu inovatif yaklaşım, Enjoy'u çok daha az malzeme ile üretilen çevreci bir ürün haline getiriyor.

Designs that introduce provide water contact with fewer materials… The ideal choice for those who want both ease of use and aesthetics in the dynamic bathrooms of today, Enjoy was designed as a walk-in shower pan that is flush with the floor. This innovative approach makes Enjoy an environmentally-friendly product as it is manufactured with fewer materials.



Kale Easy Clean ile içiniz rahat!

You will rest easy with Kale Easy Clean!

Çünkü banyoda Kale varsa, temizlikte de hijyen ve kolaylık var.

Nanoteknoloji ürünü özel Kale Easy Clean kaplama, banyolarınızın temizliğine akılcı bir çözüm sunuyor.

Sudaki kireç ve diğer korozif bileşenler (klor, kalsiyum, magnezyum) ile şampuan, sabun, duş jeli gibi temizlik malzemeleri, normalde yüzeylerde zamanla birikerek bir tabaka oluşturur. Easy Clean teknolojisi sayesinde, seramik yüzeyleri sıvıyı iter ve kirlenmeye neden olan maddelerin yüzeyde tutunmasını engeller. Böylece vitrifiye ürünleri ve duş - küvet kabinleri ilk günkü gibi temiz ve parlak kalır.

Because if your bathroom has Kale, cleaning is easy and hygienic.

The special nanotechnology product Easy Clean glaze is a smart solution for cleaning your bathroom.

Normally, lime and other corrosive compounds in water (chlorine, calcium, magnesium) and the cleaning products we use, such as shampoo, soap and shower gel, accumulate and form a layer on the surfaces. The Easy Clean technology pushes liquid on the surface of ceramics and prevents the substances which lead to soiling from ever sticking to the surface. As a result, sanitary ware products and shower-bathtub cabins stay as clean and bright as they day they were purchased.

Kale Guard ile sürekli koruma.
Continual protection with Kale Guard.

Nanokompozit ürünü özel Kale Guard kaplama ile yeni bir dönem.

Kaplama konusunda en gelişmiş teknolojiye sahip Kale Guard, antibakteriyel özelliği sayesinde yüzeylerde maksimum hijyen sağlıyor.

Yetersiz aydınlatmaya sahip banyolarda bile vitrifiye yüzeyleri bakterilerden korurken, temizlik kimyasallarına ve aşınmaya karşı da üstün koruma sağlıyor. Ayrıca, özel yapısı sayesinde, su lekelerine, toza, mantara, küfe, bakterilere karşı üstün dayanım sağlıyor.

A new era in nanocomposite coating.

Kale Guard employs the most advanced coating technology, providing maximum surface hygiene thanks to its antibacterial characteristics. It also cleans itself effortlessly. It not only protects sanitary ware surfaces from bacteria in bathrooms with insufficient light, but it also provides superior protection against chemicals and corrosion. Furthermore, due to its special structure, it provides superior resistance to water stains, dust, mold, mildew and bacteria.

Wellness.

Kale Wellness ile banyoda gerçek rahatlama... **Hidromasaj**
Real relaxation in the bath... Hydromassage

Basınçlı hava ve su karışımının insan vücuduna direkt ve dolaylı olarak çarpmasıyla oluşan masaj hareketi olarak tanımlanan hidromasaj, en etkili hidroterapi yöntemi olarak kabul ediliyor.

Kale'nin küvet ve masajlı duş sistemlerinde kullanılan hidromasaj sistemleri, vücudunuzu stres ve yorgunluktan arındıracak tüm özellikleri taşıyor. Kale hidromasaj sistemleri çeşit bakımından su ve hava masajı olarak 2'ye ayrılıyor. Basınçlı suyun jetler aracılığıyla vücuda püskürtülmesi su masajı, havanın blower aracılığıyla küvetin içine verilmesi ise hava masajı olarak adlandırılıyor.

Hidromasaja dair kilit noktalar
— Hidromasajın etkisi, suyun vücuda çarpma gücünden ziyade su ve havanın karışımından oluşan kabarcıkların çıkış gücüne ve yoğunluğuna bağlıdır.
— Hava ve su jetlerinin küvetteki pozisyonları ile çıkan su ve havanın yönü önemlidir.
— Hidromasaj sırasında küvet içine banyo köpüğü konulmamalıdır.
— Hidromasaj sırasında küvetteki suyun ısısı ortalama 37°C civarında olmalıdır.
— 30-35°C sıcaklığındaki su uyarıcı niteliktedir.
— 35-37°C sıcaklığındaki su sakinleştirici ve dinlendirici niteliktedir.
— 38°C sıcaklığındaki su gevşetici niteliktedir.
— Hidromasajda iyi bir masaj için ideal süre, 15-20 dakikadır. Çok uzun süre kalmak kasların aşırı gevşemesi ve kan basıncının düşmesi (tansiyon düşmesi) gibi istenmeyen sonuçlara yol açabilir. Yemeklerden en az iki saat sonra hidromasaja başlamak gerekmektedir.

Hidromasaj sistem çeşitleri:
— Su Masajı
— Hava Masajı

Hydromassage is defined a massage applied by direct or indirect contact with a mixture of pressurized water and air and is recognized as the most effective form of hydrotherapy.

The hydromassage system employed in Kale's bathtub and shower massage systems have everything you need to eliminate stress and fatigue from your body. The Kale hydromassage systems can be divided into two types: water and air massage. Water massage is spraying the body with pressurized water via jets and air massage is defined as bubbling air into the tub via a blower.

Key points regarding hydromassage
— The effectiveness of hydromassage depends on the force and concentration of the bubbles in the mix of water and air. It is not measured by the force with which it hits the body.
— The position of the air and water jets in the bathtub and the direction of the expelled water and air are important.
— Bubble bath should not be added to the water during a hydromassage.
— The temperature of the water in the bathtub during a hydromassage should be on average 37°C.
— Water at 30-35°C has a stimulating effect.
— Water at 35-37°C has a calming and refreshing effect.
— Water at 38°C is relaxing.
— 15-20 minutes is the ideal length of a hydromassage. Staying in the bathtub for too long can have undesirable consequences such as excessive muscle relaxation and low blood pressure. Wait at least two hours after a meal before having a hydromassage.

Types of hydromassage systems:
— Water Massage
— Air Massage

Kale Hidromasajlı Küvetler
Hydromassage Bathtubs

Kale hidromasajlı küvetlerde, stres ve gerilimden uzaklaşmanızı sağlayan su ve hava masajı bulunur. Su masajı, su jetlerinin doğrudan vücudun en çok ihtiyaç duyduğu noktalara yönlendirilmesiyle canlandırıcı bir etki yaratır. Su / hava masajı ise küvet tabanından gelen hava kabarcıkları ile vücudu rahatlatır.

Hidromasajlı küvetler, hidromasajın tüm rahatlatıcı özelliklerini, SPA merkezlerine gitmeye gerek kalmadan evlere getiriyor. Su, hava ya da su—hava karışımıyla yapılan hidromasaj, farklı etkileriyle vücudu yeniliyor.

Hidromasaj, yönlendirildiği yere ve derecesine göre gevşetiyor, ağrıları azaltıyor ya da vücudu canlandırıyor.

Kale hydromassage bathtubs give you a water and air massage that relieves stress and tension.
A water massage is a rejuvenating experience as water jets can be directed at the place on your body that needs it the most. An air/ water massage, on the other hand, relaxes the body with air bubbles that comes from the bottom of the tub.

Hydromassage bathtubs bring all of the relaxing features of hydromassage into your home so you do not have to go to the SPA. A hydromassage with water, air or a combination of the two rejuvenates the body with different characteristics.

Depending on the force and area of application, a hydromassage can be relaxing, relieve pain or refresh the body.
