Dünyaca Ünlü Bir Cevher; Azure

Tüm dünyada aranılan ve limra türü doğal taş olan Azure, dekoratif amaçlı kullanılıbileceği gibi modern binaların farklı alanlarında da kendini gösteriyor.

Vazgeçilmez doğal taşlar arasında sayılan Azure, homojen renk dağılımı ile de oldukça sade ve çekici bir görsellik yaratıyor. Taşın donma-erime çevrimine karşı dayanıklılığı, benzerleri arasında dikkat çekerken aynı zamanda çok farklı projelerde tercih edilmesini sağlayan üstünlükleri arasında.

A World-Famous Ore: Azure

In demand all around the world Azure, a lymra type of natural stone, can be used for decorative purposes and often finds itself on display in different sections of modern buildings.

Considered to be one of the most indispensable natural stones Azure creates a quite simple and attractive visual with its homogenous color distribution. While distinguishing itself among similar stones, the freezing-melting cycle of this stone is one of the reasons it is preferred in very diverse projects.

Proper installation is critical. To help ensure a successful installation, please take note of the steps outlined below:

- Make sure your installer understands the special patterns and blending requirements that are part of the job. To ensure satisfactory results, we strongly recommend blending all tiles before installation.
- See that your installer reviews and understands any special installation procedures recommended for specific products.
- Confirm that all products have been inspected and approved before installation begins, as the installation of the product signifies acceptance.

Care and Cleaning Recommendations

Stone is a natural product and care should be taken to protect it from hard abrasive cleaners and abrasive cleaning tools. While the right product for cleaning specific stones varies, we generally recommend Kale products such as "stone surface cleaner" for polished stones and honed marbles and limestone and tumbled stones.
